## Industrial Vacuums for Hazardous Materials

Explosion Proof Dust Ignition Proof Compressed Air Operated Pneumatic Table Top and Back Pack Portable Cleanroom Vacuums

II 2 GD c IIC T6 (85°C)

Class I, Division 1, Groups A, B, C and D T6 and Class II, Division 1, Groups E, F, G, Hazardous Locations as defined in the National Electric Code (NFPA 70)

Certified EPL Db and EPL Gb (Equipment Protection Level)

PrestiVac cleanroom vacuums are specifically designed to be used in ISO 4 (Class 10) cleanroom/controlled environments for decontamination control. The stainless steel construction is easy to clean and sterilize. The

exhaust air is filtered through a **ULPA** filtration system with an efficiency of 99.9995% @ 0.12 micron, eliminating the risk of any contamination. Our compressed air operated cleanroom vacuums do not have any electrical components that can cause any Electromagnetic Interference (EMI) / Radio-Frequency Interference (RFI) that can affect any electronic equipment in the cleanroom.

Prestivac explosion proof/dust ignition proof vacuums are designed to safely vacuum explosive, combustible conductive\* dusts. Our explosion proof/dust ignition proof vacuums are completely grounded and static dissipating because they are built entirely with non-sparking metals and do not have any painted components so there is no risk of fire or explosion from a spark or static build up. Compressed Air-Operated Vacuums have no motor or electrical components that can overheat and be a source of ignition. Our explosion proof vacuums comply with NFPA 484 guidelines and are an effective tool for good housekeeping practise as per OSHA.
