PrestiVac explosion proof/dust ignition proof immersion separator vacuums are designed to safely vacuum explosive, combustible conductive dusts. Our immersion separator system neutralizes explosive, conductive, combustible dust by submerging it into a neutralizing liquid bath, rendering it inert and eliminating any risk of fire or explosion. These explosion proof vacuums comply with NFPA 484 guidelines and are an effective tool for good

housekeeping practise as per OSHA. Compressed Air-Operated Vacuums do not have any electrical components that can overheat and be a source of ignition. Our explosion proof/dust ignition proof vacuums are completely grounded and static dissipating because they are built entirely with non-sparking metals and do not have any painted components so there is no risk of fire or explosion from a spark or static build up.
